

March 29, 1973

(Start of Belt #14)

not done and I asked Senator Barnett yesterday if the report is ready so he could take it up this morning if we decided to take it up this morning and he said, yes, the report is already to go. And so this is a point of clarification, but he refused yesterday to give me the report which was the final date. So I went to him and I said, Ok, if you are not going to give me the report, then I am going to put the regular Committee chairman's report in the Journal, in the Legislative Journal. So I went to him and I said, Now do you want to put your report in so it will be in at the same time this goes. He said, No. So, then, I immediately took the report to the Clerk of the Legislature and it was presently written and printed in the Legislative Journal.

SPEAKER: Senator Barnett seems to be unavailable. He is suppose to be back a little later. He asked to be excused for a few minutes. I think we will cut off the dialogue on it now and if, when he returns, you want to make an action why we might consider it at that time.

CLERK: Mr. President, we have two Committee reports.

SPEAKER: The clerk will read.

CLERK: Your Committee on Labor--read. That is all, Mr. President.

SPEAKER WHITNEY: We shall now take up General File LB-36.

CLERK: LB 36. Read title. Mr. President, there are no Committee amendments because the bill was originally indefinitely postponed and then raised on the floor of the Legislature. There are amendments offered by Senator Clark.

SPEAKER: The chair recognizes Senator Clark.

SENATOR CLARK: Mr. President, members of the body, I do have two amendments for this bill up there. I would ask the clerk to read these amendments and go them one at a time and adopt them one at a time.

CLERK: On the first one, on Page 2---read.

SENATOR CLARK: Now, I move for the adoption of the amendment. Now, what this does is to convey the lands from the School Lands, only the roads. Now, you can't reduce the trust by any amount of money at all and that is the problem we were having here, was getting this amendment drawn in the right form. Emory Burnett drew this amendment and what it says is that they would convey the thirty-three feet of the sixty-six feet if it's a meandering road through the lands. The reason we want to convey these in deed form is because there is no way to put federal secondary money on those particular lands, those roads, unless they are deeded to the county. Now, we also have a problem with the state roads going by and that's what this second amendment is about. That's all this does. We are going to pay for the appraised value or \$1.00 per acre, whichever is greater. and I'll be glad to answer any questions about it but I would move for the adoption of the amendment.

SPEAKER: The chair recognizes Senator Syas.

SENATOR SYAS: Who is going to pay for the appraised value of this thirty some feet of school land that belong...

SPEAKER: Senator Syas, are you directing your question to Senator Clark.

SENATOR SYAS: Yes, I am.
